Practical – IV

Roll No.:52	Name:Divyanjali yadav
Class: TYIT	Batch:
Date of Assignment: 17-07-2026	Date/Time of Submission: 17-07-2026

Create an ASP.NET Web Forms application using simple server controls.

4(A)

Aim: Design a Student Registration Form using the following ASP.NET controls:

- i. Label and TextBox to accept Student Name
- ii. RadioButton to select Gender (Male/Female)
- iii. DropDownList to select Course (BSc IT, BSc CS, BCA)
- iv. CheckBox for accepting Terms & Conditions
- v. Calendar control to select Date
- vi. Button control to submit the form
- vii. Label control to display the output

Algorithm:

Step1 :- Start the program.

Step2 :- Create an [ASP.NET](#) Web Form and add the required controls (Label, RadioButtonList, DropDownList, Calendar, Button, Label).

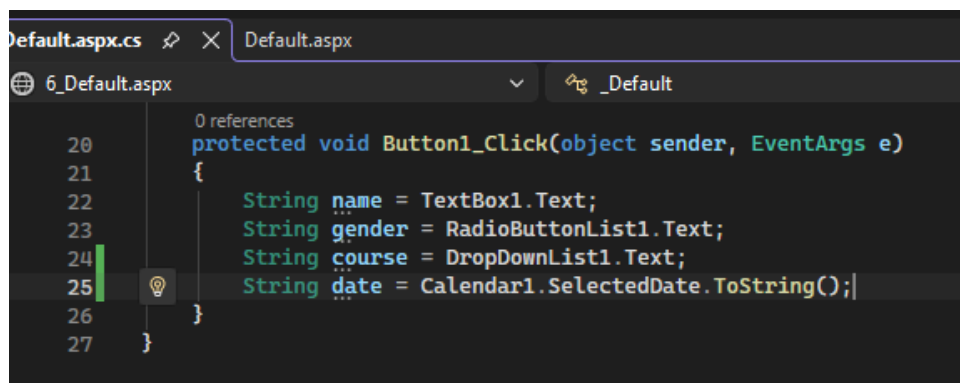

Step3 :- Enter the Name, select Gender, Course, and Date.

Step4 :- Click the Submit button.

Step5 :- Read the input values and display them in the output label (Label2).

Step6 :- Stop the program.

Code:

```

20 0 references
21 protected void Button1_Click(object sender, EventArgs e)
22 {
23     String name = TextBox1.Text;
24     String gender = RadioButtonList1.Text;
25     String course = DropDownList1.Text;
26     String date = Calendar1.SelectedDate.ToString();
27 }
  
```

Output:

© 2026 - My ASP.NET Application

4(B)**Aim: Create a Registration form to demonstrate use of various Validation controls.****Algorithm:****Step 1:-** Start the program.**Step 2:-** Create two Password TextBoxes (txtPass and txtConfirm) and add a CompareValidator**Step 3:-** Enter the password and confirm the password.**Step 4:-** Click the Submit button.

Step 5:- The CompareValidator checks whether both passwords match and displays an error message if they do not.

Step 6:- Stop the program.

Code: `<%@ Page Title="Home Page" Language="C#" MasterPageFile="~/Site.Master" AutoEventWireup="true" CodeFile="Default.aspx.cs" Inherits="_Default" %>`

`<asp:Content ID="BodyContent" ContentPlaceHolderID="MainContent" runat="server">`

`<div>`

`<asp:Label ID="Label2" runat="server" Text="Name"></asp:Label>`

`<asp:TextBox ID="TextBox2" runat="server"></asp:TextBox>`

`<asp:CustomValidator ID="CustomValidator1" runat="server" ControlToValidate="TextBox2" ErrorMessage=" It should not empty"></asp:CustomValidator>`

`<br />`

`<asp:Label ID="Label3" runat="server" Text="Age"></asp:Label>`

`<asp:TextBox ID="TextBox6" runat="server"></asp:TextBox>`

`<asp:RangeValidator ID="RangeValidator1" runat="server" ErrorMessage="Invalid age" MaximumValue="90" MinimumValue="18" ControlToValidate="TextBox6"></asp:RangeValidator>`

The screenshot shows a web application titled "Application name". Below the title, there is a section labeled "MainContent (Custom) div". Inside this section, there is a form with the following fields and messages:

- Name:** A text box with the error message "It should not empty".
- Age:** A text box with the error message "Invalid age".
- Password:** A text box.
- Confirm password:** A text box with the error message "password not match".
- Submit:** A button.

At the bottom of the page, there is a footer that reads "© - My ASP.NET Application".

Output:

← ↻ localhost:61606/Default

Application name Home About Contact

Name

Age Invalid age

Password

Confirm password password not match

© 2026 - My ASP.NET Application

c) Create Web Form to demonstrate use of Adrotator Control.

Algorithm:

Step 1:- Start the program.

Step 2 :- Create an [ASP.NET](#) Web Form with Name, Age, Password, Confirm Password fields, validation controls, and a Submit button.

Step 3:- Enter the required details in all the input fields.

Step 4:- Click the Submit button

Step 5 :- Validate the inputs using RequiredFieldValidator, RangeValidator, and CompareValidator. If all validations are successful, the form is submitted; otherwise, error messages are displayed.

Step 6:- Stop the program.

Code:

```

XMLFile.xml  ✕  Default.aspx
1  <?xml version="1.0" encoding="utf-8" ?>
2  <Advertisements>
3      <Ad>
4          <ImageUrl>images/images.jpg</ImageUrl>
5          <NavigaterUrl>https://www.google.com</NavigaterUrl>
6          <AlternateText>Collage logo</AlternateText>
7          <Height>50</Height>
8          <Width>50</Width>
9      </Ad>
10 </Advertisements>

```

```
XMLFile.xml  Default.aspx  ✕  ✕
Client Objects & Events
1  <%@ Page Title="Home Page" Language="C#" MasterPageFile="~/Site.Master"
2
3  <asp:Content ID="BodyContent" ContentPlaceHolderID="MainContent" runat=
4
5  <div style="height: 299px" >
6      <asp:Label ID="Label1" runat="server" Text="Name"></asp:Label>
7      <asp:TextBox ID="TextBox1" runat="server"></asp:TextBox>
8      <asp:RequiredFieldValidator ID="RequiredFieldValidator1" runat=
9      <br />
10     <br />
11     <asp:Label ID="Label2" runat="server" Text="Age"></asp:Label>
12     <asp:TextBox ID="TextBox2" runat="server"></asp:TextBox>
13     <asp:RangeValidator ID="RangeValidator1" runat="server" Control
14     <br />
```

Output:

Name name cant be empty

Age invalid age

Password

Confirm Password password incorrect
